Preparation

Please pay careful attention to the instructions when preparing infant milk formula. Incorrect preparation or storing compounded feeding diets for a longer period of time are not foodstuff to be kept (e.g. due to reduced bacterial growth for this reason, always prepare the formula from scratch before every meal and feed immediately. Do not use leftovers.

Close bottle tight and shake vigorously. Then open the cap tightly after every use, store in a cool place at room temperature (max. 25°C) and use up within 3 weeks.

Drinking amount & dosing

The drinking amount per feeding bottle may vary from baby to baby. The recommended drinking amounts and the number of bottles per day are guidelines. Your baby does not necessarily have to empty the feeding bottle completely.

Please use the enclosed measuring spoon only!

Use 30 ml boiled water per measuring spoon.

Important dietary fibres (GOS*) in-
cluded in the unique composition of the product. As HiPP 1 Combiotic® may lead to softer stools, similar to those of breastfed babies, due to the unique combination of valuable ingredients that are inspired by nature, you are providing your baby good start into a happy future.
